

## Random Fights Among PD Residents

Gunfights and sword fights between individuals were an important part of the Golden Age of Pirates, Pirates Destiny is a ROLEPLAY sim and NOT a combat sim. Therefore, we expect a decent amount of roleplay (from everyone involved in the roleplay) before any fighting between individuals takes place. Your opponent should respond before you attempt to shoot or stab them.

Shooting or stabbing anyone (or any other weapon attack) without a proper in character reason (or without proper roleplay) is not tolerated here and can result in a warning or temporary ban from the sim.

If you think you have been a victim of random shooting, make every effort possible to continue the roleplay and seek help from an Admin afterwards. A notecard of the unedited scene will prove helpful. Do not bring OOC (out of character) arguments into open chat.
