

Brewing Recipes in Pirates Destiny

2 Sep 2023

Here we have many drinks to create.

- Rum
- Whiskey
- Vodka
- Sake
- Blueberry wine
- Strawberry wine
- Ayahuasca
- Mead
- Ale

Ingredients:

1. These ingredients are grown on farms (see the farming book)
 - Sugar cane
 - Corn
 - Potatoes
 - Rice
2. These ingredients are found in the forest (see the hunting and gathering book)
 - Blueberries
 - Strawberries

The distillery is in Nassau town.

RUM

- Rum is made from sugar canes. Each sugar cane stack contains 10 canes. You will first need to grind them in the grinder in the distillery. It takes 5 stamina per go. You then split the sugar can juice in half. Turn one half into sugar using the sugar vat in the distillery. This does not require stamina. The other half you sail to Aruba. On one of the islands is the molasses kiln. This does not require stamina either. Bring the sugar and molasses back to the distiller in the back of the distillery and rez them on the floor close by. Sit on the distiller, click it and choose rum.

Whiskey

- Whiskey is made from corn. You first grind it in the distillery then all you need to do is distill it.

Vodka

- Vodka is made from potatoes. You first grind them then distill them.

Sake

- Sake is made from rice. Just grind and distill.

Blueberry and Strawberry wine

- The name says it all. There is a fruit stomping barrel on ground floor of Pirate's Harbor. After that you sail to Port Royal to a light house. Close by is the Fermentation & Clarification Barrel. That's all there is to it.

Ayahuasca

- This drink is a little different from the others. It's made by the natives and whoever is able to friend them, in order to find out the secret recipe. Can you use your charm and sharp wit to gain the knowledge?

Making Ale & Honey Mead The following is how to make your own Ale or Honey Mead:

Gather your supplies – Items Needed:

- Note: 6 hops and 6 barely growing in the forest level.)

Firewood – Required to start the fire under the Brewer: You get this when you cut down a

- PD ~Tree for the lumber.
- PD ~ Lumber tree can be chop into 3 Firewood or load as Lumber

Ingredients for 2 Ale:

- Hops – 1
- Barley – 1
- Sugar – 10
- Water – 5

Ingredients for 2 Honey Mead

- Honey – 3
- Water – 5

Brewing the Ale or Mead:

1. Rez your firewood at the base of the brewer
2. Right click and use the hearth.
3. Click the brewer and load ingredients.
4. When that is finished, click the brewer again and ignite the brewer.
5. Click it again to brew your Ale or Meade.
