

Tool Tutorial

Following is a step by step guide to Creating a tool:

NOTE: A multitude of tools are available for use. Its strongly suggested you familiarize yourself with the formulas in making them

THE ANVIL

STEPS

1. Go to the Anvil (To make a tool Head only)
2. Rezz your needed Materials on the ground
3. Click the anvil and select Load items. The items will be loaded into anvil
4. Click on the anvil again and select the tool head you need and an animation will begin
5. Once finished a box will appear. Accept your tool head and it will appear in your objects folder in your inventory

THE WORK BENCH (located to the side of the Lumber Mill)

1. Go to the Workbench
2. Rezz lumber, Nails and Tool Head on the ground
3. Click the Bench and select Load items. The items will be loaded into anvil
4. Click on the Bench again and select the tool you need and an animation will begin
5. Once finished a box will appear. Accept your tool head and it will appear in your objects folder in your inventory
