

# Brewing Alcohol in Pirates Destiny

Here we have many drinks to create.

- Rum
- Whiskey
- Vodka
- Sake
- Blueberry wine
- Strawberry wine
- Ayahuasca
- Mead
- Ale

Ingredients: These ingredients are grown on farms (see the farming book)

- Sugar cane
- Corn
- Potatoes
- Rice

These ingredients are found in the forest (see the hunting and gathering book)

- Blueberries
- Strawberries

The distillery is in Nassau town.

## **Rum**

- Rum is made from sugar canes. Each sugar cane stack contains 10 canes. You will first need to grind them in the grinder in the distillery. It takes 5 stamina per go. You then split the sugar can juice in half. Turn one half into sugar using the sugar vat in the distillery. This does not require stamina. The other half you sail to Aruba. On one of the islands is the molasses kiln. This does not require stamina either. Bring the sugar and molasses back to the distiller in the back of the distillery and rez them on the floor close by. Sit on the distiller, click it and choose rum.

## **Whiskey**

- Whiskey is made from corn. You first grind it in the distillery then all you need to do is distill it.

## **Vodka**

- Vodka is made from potatoes. You first grind them then distill them.

## **Sake**

- Sake is made from rice. Just grind and distill.

## **Blueberry and Strawberry Wine**

- The name says it all. There is a fruit stomping barrel on the ground floor of Pirate's Harbor. After that you sail to Port Royal to a lighthouse. Close by is the Fermentation & Clarification Barrel. That's all there is to it.

# Brewing Alcohol in Pirates Destiny

## **Ayahuasca**

- This drink is a little different from the others. It's made by the natives and whoever can befriend them, to find out the secret recipe. Can you use your charm and sharp wit to gain knowledge?

## **Making Ale & Honey Mead**

- See the full recipe and instructions at: <http://www.cerob.com/pd/docs/Ale-Mead.pdf>
